PROCEEDING

The 6th International Conference on Sustainable Animal Agriculture for Developing Countries (SAADC 2017)

October 16-19, 2017
The Singhasari Resort, Batu City, Indonesia

Organized by:

Faculty of Animal Husbandry, Brawijaya University, Indonesia

In Collaboration with:

Institute of Tropical Agriculture and Food Security, Universiti Putra Malaysia, Malaysia

Australia’s Aid Program, Department of Foreign Affairs and Trade, Australian Government

Chief Editor :
Prof. Ifar Subagiyo

Editor :
Prof. Juan Boo Liang (Malaysia)  Prof. Chalermporn Yangklang (Thailand)
Prof. Joachim Balcells (Spain)  Prof. A.K. Thiruvenkadan (India)
Prof. Peter Charles Wynn (Australia)  Dr. Hassan Mahmood Warriach (Pakistan)
Prof. Suyadi (Indonesia)  Dr. Marjuki (Indonesia)
Prof. Pramote Paengkoum (Thailand)  Dr. Thanh Vo Thi Kim (Vietnam)

PREFACE

It is my privilege to thanks to all of authors for your enthusiasm in participating and contributing papers at this 6th International Conference on Sustainable Animal Agriculture for Developing Countries (The 6th SAADC-2017) that had been successfully held on 16-19 October 2017 in The Singhasari Resort, Batu City, Indonesia with the theme of “Wisdom of Using Local Resources for Development of Sustainable Animal Production in Developing Countries”

The primary objective of the 6th SAADC-2017 was to provide a scientific forum for animal scientists and producers, and administrators of livestock related agencies, particularly from the developing countries, to share their experiences, discuss issues and suggest recommendations to develop further a more sustainable livestock production.

This proceeding contains selected papers that were presented in the conference based on the quality and relevancy to the conference. The papers are reflecting responsiveness of animal scientist from various countries in promoting sustainability of animal agriculture for the prosperity of the never ending generations. These proceeding hopefully will certainly enrich the body of knowledge and understanding about various aspects related to sustainable animal agriculture.

Our special thanks are also for the SAADC President for his confidence to our Universitas Brawijaya to organize this prestigious conference. Also, congratulation that SAADC is now listed in the International Congress and Conference Association (ICCA) based on its quality and consistent activities.

We also wish to thank all partners and sponsors for their support to the success of the conference. To colleague members of the organizing committee, please accept my deep appreciation for your hard working in ensuring the success of the conference.

Yours Sincerely,

Prof. Ifar Subagiyo
Chief Editor
CONFEREECE COMMITTEE

International Advisory Committee
Chairman:
Prof. Dr. Juan Boo Liang (Malaysia)

Secretary:
Dr. Elizabeth Wina (Indonesia)

Members:
Prof. Dr. Peter Charles Wynn (Australia)
Prof. Dr. Ermias Kebreab (USA)
Prof. Dr. Hiroyuki Hirooka (Japan)
Prof. Dr. Harinder Makkar (FAO)
Prof. Dr. Liang Chou Hsia (Taiwan)
Prof. Dr.Sc.Agr. Ir. Suyadi, MS (Indonesia)
Prof. Dr. Long Ruijin (China)
Prof. Dr. Chul-Ju Yang (Korea)
Prof. Dr. Chalermpon Yuangklang (Thailand)
Assoc. Prof. Dr. Yoshiaki Hayashi (Japan)
Assoc. Prof. Dr. Pramote Paengkoum (Thailand)
Dr. Pietro Celi (USA)
Dr. Chris McSweeney (Australia)
Dr. Sosheel Godfrey (Australia)
Dr. Hassan Warriach (Pakistan)
Dr. Vo Thi Kim Thanh (Vietnam)
Dr. Peter Daniels (Australia)

Organizing Committee
Advisors:
Prof. Dr. Ir. Mohammad Bisri, MS (Rector of Brawijaya University)
Prof. Dr. Ir. Kusmartono (Vice Rector for Academic Affair of Brawijaya University)
Prof. Dr.Sc.Agr. Ir. Suyadi, MS (Dean of Faculty of Animal Husbandry, Brawijaya University)

Conference Chairman:
Prof. Dr. Ir. Ifar Subagiyo, M.Agr.St.

Vice Confernce Chairman:
Dr. Ir. Marjuki, M.Sc.

Secretary:
Dr. M. Halim Natsir, S.Pt., MP
Aswah Ridhowi, S.Pt., MP, M.Sc.
Awang Tri Satria, S.Pt., ME
Jaisy Agniarachim P.T., S.Pt., MP
Financial/Treasurer
Prof. Dr. Ir. Ani Nurgiartiningish, M.Sc.
Deny Agustiningsih, SH.
Asri Nurul Huda, S.Pt., MP, M.Sc

Website
Ahmad Riyanto
Arifatul Hafidz Achsan
Zaenal Abidin

Scientific Committee
Dr. Ir. Gatot Ciptadi, DESS (Indonesia)
Aulia Puspita Anugera Yekti, S.Pt., MP, M.Sc. (Indonesia)
Yuli Frita Nuningtyas, S.Pt., MP, M.Sc. (Indonesia)
Prof. Dr. Ir. Trinil Susilowati, MS (Indonesia)
Prof. Yusuf L. Henuk (Indonesia)
Prof. Dr. Juan Boo Liang (Malaysia)
Dr. Elizabeth Wina (Indonesia)
Dr. Vincenzo Tufarelli (Italy)
Prof. Dr. Peter Wynn (Australia)
Assoc. Prof. Dr. Songsak Chumpawadee (Thailand)
Dr. Peter Daniels (Australia)
Prof. Dr. Ermias Kebreab (USA)
Dr. Norhani Abdullah (Malaysia)
TABLE OF CONTENTS

KEYNOTE ADDRESS AND INVITED SPEAKER

Keynote Address
Making money from milk on small-holder dairy farms in the tropics: an international perspective

Invited Speaker
Robust study design for animal production in developing countries
Peter C. Thomson

Invited Speaker
Implementation of breeding programme for sustainable livestock production in tropical countries
A. K. Thiruvenkadan

Invited Speaker
Symbiotic relationship and sustainable agriculture
K. G. Dande

Invited Speaker
Herd characteristic, feed resource and socioeconomic aspect of smallholder dairy farm in Lampang province, northern Thailand
S. Wittayakun, W. Innaree, W. Chainetr and J. Lerdai

Invited Speaker
Towards a cost-effective feeding of broiler chickens
Zulkifli Idrus

ORAL PRESENTATION

Animal Production

AP – 107 Plasma leptin ghrelin and their expression of receptors in different tissues and on production performance during post summer period in PD3 chicken line

AP – 108 Egg yolk cholesterol and serum metabolites of laying hens fed dried tomato (Solanum lycopersicum L) meal in diet
Leke J., J. S. Mandey, F. Ratulangi, D. Rembet and S. E. Surtijono

AP – 109 Carcass quality as well as composition and oxidative stability of the meat of crossbreds of Thai indigenous chickens and a layer breed as compared with purebred Thai indigenous, layer and broiler chickens
C. Kaewkot, M. Kreuzer and S. Jaturasitha

AP – 110 Effect of genotype on productive and reproductive traits of Desert and Taggari goats managed under natural grazing during rainy season
I. Bushara., Hind, A. Salih., Mohamed, O. Mudalal Dafalla and M. Mekki

AP – 112 Dairy cattle biogas unit sludge on the nutrient of rice straw compost
Mochammad Junus

AP – 116 Effect of rice hull inclusion with and without enzymes on growth performance and digestive traits of broilers
Hartini, S., D.D. Rahardjo and P. Purwaningsih

AP – 117 The effect of restricted feeding to reproductive performance on sexual maturity of quail (Coturnix coturnix japonica)
Rosa Tri Hertamawati, Suyadi, Edhy Soedarjo and Osfar Sjofjan

AP – 120 Behaviour of imported brahman cross cows maintained by smallholder farmers
Tri Satya Mastuti Widi, Diah Tri Widayati, Sidiq Tri Pamungkas and Ulfadina Syahdianti

Theme: Wisdom of Using Local Resources for Development of Sustainable Animal Production in Developing Countries
| AP – 121 | Comparison of performance, incidence of foot pad dermatitis, and gut microflora of broiler chickens raised on floor pens and in cages in a tropical environment | 64 |
| AP – 122 | The effect of daylight transportation through body weight loss and physiology response between sheep and lambs | 67 |
| AP – 127 | The productivity of Kejobong and Bligon Goats, local Indonesian goats developed by farmers | 71 |
| AP – 130 | Carcass characteristic of Bali bull on different ages | 75 |
| AP – 133 | Effect of time of first colostrums feeding on serum immunoglobulin concentration and body weight gain in Friesian Holstein calves | 78 |
| AP – 134 | Characteristics of goat farm based on farmer’s profile and goat population in Senduro Village, Lumajang Regency, East Java, Indonesia | 81 |
| AP – 136 | Poultry industry and strategy for sustainable development to 2020 | 84 |
| AP – 155 | The nutritive value of feed for raising sheep in the southern border of Thailand | 88 |

**Animal Nutrition and Feed Technology**

| ANF – 201 | Feeding microparticle protein-composed diet on protease activity and protein utilization in broiler chickens | 91 |
| ANF – 204 | The biological quality of adding fermented cabbage waste as probiotic to pellet calf starter diet on calf performance | 94 |
| ANF – 205 | Dietary inclusion of carrot (Daucus carota L) waste meal on performance and egg quality of laying hens after peak egg production | 97 |
| ANF – 206 | Early feed restriction and ad libitum methods on broiler performance | 100 |
| ANF – 207 | Evaluation of in vitro digestibility complete feed based on corncob as main feed formulation with different fermentation time | 103 |
| ANF – 208 | The effect of lempuyang (Zingiber zerumbet) in the organic feed towards nutritive contents of kampong chicken meat | 106 |
| ANF – 209 | Potential of bioactive compounds Archidendron jiringa by product to be natural feed additive for sustainable animal production | 110 |
| ANF – 210 | Using durian seed (Durio zibethimus) to support living kampung chicken/KC in Indonesia villages | 116 |
| ANF – 211 | Effect of inclusion of condensed tannin with differing molecular weight in diet rich in sunflower oil on ruminal pH and kinetics of gas production in vitro |
| A. Petlum, P. Paengkoum, J.B. Liang, K. Vasupen, and S. Paengkoum |
| 119 |
| ANF - 212 | The effect of substitution of groundnut cake by dried rumen content in ration for lamb fattening in Sudan |
| Amani A. B. Osman and Hafaa A. Lief Mohammed Abass |
| 123 |
| ANF – 213 | Correlation between chewing time (eating and ruminating) and rumen pH change on lambs |
| Prima, A, F.D. Nugroho, E. Rianto, E. Purbowati and A. Purnomoradi |
| 133 |
| ANF – 216 | Fecal forensic tests as an indicator digestibility on young and mature sheep |
| C.P. Sari, A. Prima, N. Luthfi, V. Restritisnani, S. Dartosukarno, and A. Purnomoadi |
| 136 |
| ANF – 220 | Effect of vitamin A restriction on carcass traits and blood metabolites in Korean native steers |
| Dong-Qiao Peng, Jae-Sung Lee, Won-Seob Kim, Young-Shin Kim, Mun-Hee Bae, Yong-Ho Jo, Young-Kun Oh, Youl-Chang Baek, Seong-Gu Hwang and Hong-Gu Lee |
| 139 |
| ANF – 221 | Stimulation of chewing activity of ewes by feeding spent mushroom substrates containing long-cut sweetcorn stover |
| Katsuki Koh, Sayaka Kurata and Chikao Hiramori |
| 143 |
| ANF – 224 | Response to tropical leaves for potential trend of total gas production in vitro in Saanen goats |
| R.A.P. Purba, P. Paengkoum, and S. Paengkoum |
| 146 |
| ANF – 225 | Buckwheat phytase activity: In vivo prediction of production performance and phytate phosphorus utilization in laying hens |
| Rakhi Chowdhury and Katsuki Koh |
| 149 |
| ANF – 226 | Effects of dietary β-1,4-mannobiose on the growth performance and productivity of Hinai-jidori chicken slow-growing Japanese meat-type chicken |
| K Rikimaru, D Aoya, Y Sato, K Fukui, M Ibuki, T Saneyasu, K Honda, and H Kamisoyama |
| 152 |
| ANF – 229 | Effects of different molecular weight tannin in roughage on in vitro gas production technique |
| Taethaisong, N. and P. Paengkoum |
| 155 |
| ANF – 230 | Effect of Pleurotus species pretreatment of lignocellulose on a reduction in lignin and the biodegradation of rice stubble |
| Vorlaphim, T., S. Paengkoum, C. Yaungklang, and P. Paengkoum |
| 158 |
| ANF – 231 | Early evaluation of 65th days after sowing bmr sorghum productivity grown on swamp soil applied with different levels of Biochar |
| Widhi Kurniawan, Hamdan Has, and Rahman |
| 161 |
| ANF – 232 | Use of live yeast culture microbial as a co-active in the rumen on gas kinetic by using in vitro gas production technique |
| Wilachai K., K. Poonsuk, and P. Pangkoum |
| 165 |
| ANF – 233 | Forage yield and nutrients quality of sticky and purple corn stover |
| Xingzhou Tian, Pramote Paengkoum, Sirinhip Traiyakun, and Siwaporn Paengkoum |
| 169 |
| ANF – 234 | Effects of aflatoxin levels in the diet on aflatoxins residues in the liver, meat, and egg of laying duck  
I. Sumantri, A. Agus, B. Irawan, and Herliani |
| ANF – 235 | Enrichment of feedstuff with fermented soybean peel to increase rabbit body weight  
Sri Minarti, Endang Setyowati, Sri Kumalaningsih, and Tatik Wardiyati |
| ANF – 236 | Influence of feed particle size on performance and gastrointestinal tract measurement of broilers from one to twenty-eight days of age  
I. Nursiam, M. Ridla, and W. Hermana |
| ANF – 239 | Hydroponic corn fodder, a potentially sustainable feed alternative to maintain feed intake of Bos taurus bulls during long transportation  
| ANF – 240 | Forage yield and nutrients quality of sticky and purple corn stover  
Xingzhou Tian, Promate Paengkoum, Srinathip Traiyakun, and Siwapon Paengkoum |
| ANF – 242 | Effect of molasses and iron (II) sulfate on fermentation and anthocyanin stability in anthocyanin-rich Napier Grass silage in in vitro  
Ngo Thi Minh Suong, Pramote Paengkoum, and Suwiporn Paengkoum |
| ANF – 243 | Effect of probiotic containing Enterobacter sp., Bacillus sp., Cellulomonas spp., Actinomyces spp. supplementation on the laying performance and egg cholesterol of quail (Coturnix coturnix japonica)  
W. P. Lokapirnasari, A.R. Dewi, A. Fathinah, S. Hidanah, N. Harijani, and Soeharsono |
| ANF – 245 | In vitro cultures of inulin from chicory on the abundance of calve fecal microbial populations by real – time PCR  
K. Kamkajon, P. Paengkoum, S. Paengkoum, and Z. Yu |
| ANF – 247 | Effect of a mixture of jackfruit peel (Artocarpus heterophyllus) and manure fermented by using Aspergillus oryzae on NH3, VFA concentration and estimated ME, NE, OM and MP values in vitro  
Mashudi, Kusmartono, and I. Wijaya |
| ANF – 249 | Optimization of enzymatic hydrolysis of palm kernel expeller and its effect on broiler’s growth performance  
Wei Li Chen, Mohammad Fasaleh Jahromi, Norhani Abdullah Zulkifli Idrus, and Juan Boo Liang |
| ANF – 250 | The correlation between protein and fat in meat with protein intake of local lambs  
R. Kussetiyawan, A. Prima, N. Luthfi, M. Arifin, C. M. Lestari, and A. Purnomoadi |
| ANF – 252 | Effects of oil palm leaflets in total mixed ration on nitrogen utilization, rumen fermentation and growth in goats  
B. Khamseekhiew, O. Pimpa, P. Nakaviroj, and T. Jettana |
| ANF – 255 | The proximate analysis and in vitro gas production of some types of waste paper  
Mohamed E. Elimam and Farha E. Daffa Alla |
| ANF – 256 | Physical and chemical qualities of dwarf elephant grass Pennisetum purpureum cv Mott silage  
Irsoyamawati, A., I. Subagiyo, M.C.C.D Sahanaya, and G. Wibisono |
ANF – 257  Nutrient composition, tannin concentration and fibre component of tea leaf (*Camellia sinensis*, l.) as *Attacus atlas* (l.) larval feed  
Anita S. Tjakradidjaja, Wibowo Mangunwardoyo, Asnath M. Fuah, and Andi Salamah

ANF – 265  *Mitsuokella jalaludinii* supplementation improved nutrient utilization of broilers fed low available phosphorous diet  
Hooi Chia Tang, Chin Chin Sieo, Norhani Abdullah, Chun Wie Chong, Abdul Rahman Omar, Rosfarizan Mohamad, and Yin Wan Ho

ANF – 268  The effects of feeding flavonoids compounds from Iranian propolis extracts to Holstein milk production and quality  
Sh. Ehtesham, A. R. Vakili, and M. Danesh Mesgaran

ANF – 269  Effect of symbiotic meal on *Salmonella sp.*, *Escherichia coli*, and lactic acid bacteria population of broiler  
Syaiful Haq Baderuddin, Ilham Adiansah, Ardi Yusuf Bachtiar, Kholifatus Soliha, Osfar Sjofjan, and Eka Wulandari

ANF – 270  Response to differential native asian leaves for trend of total gas production *in vitro* in Saanen goats  
R. A. P. Purba and P. Paengkoum

ANF – 272  Organoleptic characteristics of eggs produced by local hens fed diets containing cakalang (*Katsuwonus pelamis* L) fish oil waste  

ANF – 274  Effect of prebiotic and Immunowall® as feed additive in enzyme activity, intestinal characteristic, and broiler performance  
O. Sjofjan, E. Widodo, and H.M Natsir

ANF – 276  Enrichment of omega-3 long chain fatty acids into the egg yolk of Mojosari ducks through dietary fish oil and tomato powder supplementation  
F. Andri, E. Widodo, and I.H. Djunaidi

ANF – 279  Corn straw based on complete feed silage quality with adding various legumes  
Subagiyono, I., S. Chuzaemi, H. Sudarwati, A. Irsyammawati, and Marjuki

ANF – 280  *In vitro* digestibility and NH₃ concentration rice straw based on complete feed silage with inclusion of various legumes  
S. Chuzaemi, I. Subagiyono, H. Sudarwati, A. Irsyammawati, and Marjuki

ANF – 285  Effect of addition either probiotic or encapsulated in feed on intestinal microflora population of local duck  
Ilham Ardiansah, Yamasuhu Ahmad, Kholifatus Sholiha, Artita Wahyudia Safitri, Nurlayla Wijayanti and Osfar Sjofjan

ANF – 287  Fatty acid profile, omega 3, 6, 9 content and ratio PUFA, MUFA dan SFA Trevally (*Selaroides sp*) fish oil with the addition of basil leaf powder (*Ocimum basilicum*) as an antioxidant  
Minarny Gobel, Anita Trinawati, Hendriyanto, Steven Yoputra, and Fahrun

ANF – 288  Crop by-product preservation for cattle production in Central Vietnam  
Vo Thi Kim Thanh, V.B.C Nguyen, and Nguyen Vu Trong Thi

ANF – 290  Effects of partial corn replacement by palm kernel meal with different enzyme forms on performance of broilers

Abstract

The highest small ruminant population in Indonesia was goats, many East Java breeders keep goats which breed of Indonesian Local Ettawah Goats (ILEG). The purpose of this research was to know the population diversity through phenotype similarity in Sumenep Madura East Java. The subject of this research was 54 heads of ILEG which fulfill the criteria of sampling in Kalianget, Saronggi and Poteran villages. The research method was a case study with primary data taking through direct observation of ILEG does in the field. Observed variables were included variations of qualitative traits included the shape of the head, face, forehead, horns, ears, back, udder, nipple, and the color of head, face, legs and tail. Data analysis was performed with the NTSYSpc version 2.0 software program before analyzing the data was converted into binary form (1, 0). The results showed that the phenotype similarity in the three villages was range between 0.58-1. The conclusion was that the diversity of phenotypes between populations in the villages of Kalianget, Saronggi, and Porteran was 42% with a dendogram of 58%.

Keywords: phenotype diversity, goat, qualitative traits

Introduction

ILEG is one of the most well-kept livestock in the Indonesian territory crossed between Ettawah goat from India and local goat Indonesia. The type of ILEG as a dual purpose type that produces meat and milk is very suitable with the characteristics of Indonesian farmers so that it can increase the income of farmers. The breeder's characteristic is to keep the goat as a saving and not the main income (Sugiarto and Ahmad, 2015) so that the livestock is sold only when there are a family needs but not by slaughtering age. Therefore, by raising dual purpose goat the farmers can get additional daily income from milk production and goat as a saving.

The island of Madura is the territory of Indonesia northeast of East Java with an area of 5,168 km2 (smaller than the island of Bali) which is famous since ancient times has a tradition as a local cattle farmer (Madura cattle). But recent developments, people in the area have also bred ILEG goats and are reinforced by local government support through a goat contest. Sumenep regency is one of the areas of ILEG goat with good population growth.

ILEG goat breeding program in Madura was still unclear and unclear and the goats became a second priority after Madura cattle. So it was necessary to research about variation of qualitative character of ILEG goat in Madura island based on BSN (2015) standardization PE goat breeds with qualitative traits such as white, black, brown or combination of colour body; short tail; convex face; small horns; long, hanging and drooping down ears. Therefore, the purpose of this research was to know the population diversity through phenotype (qualitative trait) similarity in Sumenep Madura East Java.
Methodology

The method of this study was a case study with sampling in a purposive sampling. Research material was 54 does of ILEG which fulfill the criteria of sampling in Kalianget, Saronggi and Poteran villages. The does samples were does that have given the kid at least once and were used for breeding. The research location was in Sumenep area consisting of three villages namely Kalianget (KA), Porteran (PO), Saronggi (SE).

Variations of phenotypes observed were qualitative traits including hair color (body, tail, face, and legs), face form, forehead profile, horn shape, head profile, horn shape, fold ears, back form, udder form and number of nipples. Data were tabulated in the form of binary data (Yakubu et al., 2010 and Machado et al., 2000), the emerging phenotype was scored 1 and the non-appearing phenotype was scored 0. The tabulated data were analyzed by NTsys version 2.0 software to obtain a dendogram of qualitative traits so as to obtain similarity phenotypes.

Results and Discussion

The results of field identification for qualitative traits of ILEG maintained in Sumenep were still in accordance with standard goats PE (BSN, 2015) seen from the main characteristics of long ears down, the color of the body, face, legs, and tail were a combination of white, black, chocolate. The black or brown color of the goats because it was related to eumelanin content in goat coat which coated by melanocortin 1 receptor and inherited in offspring (Le Pape et al., 2008 and Machado et al., 2000). From binary data analysis with NTsys version 2.0 between the group of does in Kalianget Village (KA), Porteran (PO), Saronggi (SA) of Sumenep Regency could be seen in Figure 1.

Figure 1. Dendogram of Qualitative Traits in Three Villages Sumenep Madura Island

Figure 1, based on the similarity of more than two individuals, there are two clusters, the first cluster was the ILEG in the village of Porteran with the largest number of does, and the subcluster was ILEG from Saronggi and Kalinget villages. The second cluster was the ILEG in Kalianget and Saronggi villages only, in accordance with the opinion of Zaitoun et al. (2004) Jordan’s local goat group is divided into two main clusters based on morphology characteristics.

In the village of Porteran, there was a similarity value of more than two individuals with the highest score (100%), this meant that the does in the village of Porteran tended to be the lowest of its phenotype diversity compared to the Kalianget and Saronggi groups. While the dendogram based on similarity of qualitative traits in three villages of Sumenep district was
0.58, it meant that the phenotype diversity between Kalianget, Porteran and Saronggi villages was 42%. The phenotype diversity of this study was lower than that of Mudawamah et al. (2014) values of diversity based on the primary OPA RAPD between the natural goats of PE and 52% for artificial insemination.

**Conclusion**

The diversity of phenotypes based on qualitative traits between populations in the villages of Kalianget, Saronggi, and Porteran (Sumenep, Madura Island) was 42% with a dendogram of 58%.
